TO: ALL CRIMINAL JUSTICE ADMINISTRATORS
STATE OF IDAHO

Along with the Staff of the Criminal Identification Bureau of the Department of Law Enforcement, I take pleasure in presenting you with this copy of the 1979 Annual Uniform Crime Report for the State of Idaho.

As you will note, Idaho is following the national trend with a reported increase in crime this past year. With the austere fiscal policies for the State, cities and counties, and the continued rapid growth of our state, our problems for the future are easy to predict.

Hopefully, the criminal justice information provided herein will serve as a tool to facilitate anti-crime efforts.

We extend our thanks to each of you for the tremendous cooperation which has made this publication possible. It is an outstanding example of what can be accomplished by working together.

Sincerely,

Kelly Pearce

The statistical information compiled from the Uniform Crime Reporting Program has proven to be very meaningful for law enforcement administrators and public officials in planning, legislation and disbursement of funds.

Every effort has been made to verify the accuracy and completeness of this information by the reporting agencies and the Uniform Crime Reporting Staff.

The publication of this information is made possible only through the fine cooperation of the many public officials, law enforcement administrators throughout the State, and the Federal Bureau of Investigation.

The Uniform Crime Reporting Program is coordinated by Mr. B. J. Shinn and the UCR Staff.

Respectfully submitted,

Richard Burns

RICHARD BURNS, Chief
Criminal Identification Bureau

UNIFORM CRIME REPORTING

The National Uniform Crime Reporting Program, under the direction of the Federal Bureau of Investigation (FBI), is the outgrowth of the need for a national and uniform compilation of law enforcement statistics. The need for such statistics was recognized more than 45 years ago when, in 1930, the Committee on Uniform Crime Records of the International Chiefs of Police (I A C P) solicited such records from law enforcement agencies throughout the country, based on uniform classification and procedures. In that same year, the IACP requested that the FBI assume the responsibility of being the clearinghouse for the National Uniform Crime Reporting Program, a role which they maintain today.

The committee on Uniform Crime Reporting of the International Association of Chiefs of Police continues to serve in an advisory capacity to the FBI in the operation of the program. In 1966, the National Sheriff's Association established a committee on Uniform Crime Records to serve in an advisory capacity to the NSA membership and the National Uniform Crime Reporting Program, as well as actively encouraging sheriffs throughout the country to participate in the program.

During the last several years, the FBI has been actively assisting individual states in the development of statewide local law enforcement statistical programs, compatible with the national program. Idaho is one of the states which has developed and implements its own Uniform Crime Reporting Program for the benefit of public officials and law enforcement administrators.

IDAHO UNIFORM CRIME REPORTING ....

The Idaho Uniform Crime Reporting Program involves the compilation, classification and analysis of crime statistics reported by police agencies throughout the State, pursuant to guidelines and regulations subscribed by law.

The Idaho Legislature, in establishing the UCR Program, authorized the Department of Law Enforcement, Criminal Identification and Records Bureau to collect and record criminal statistics, on a statewide basis. The Criminal Identification Bureau began developing the present UCR program in the early months of 1973.

The Department of Law Enforcement requires, by statute, the submission of monthly crime statistical reports from all sheriff's departments and police departments of all municipalities of one thousand population and over. Any municipality, under one thousand in population, is encouraged to supply reports to the sheriff of the county in which they are located for inclusion in that department's reports.

In 1979, 100 agencies were solicited to participate in the Uniform Crime Reporting Program.

CRIME IN IDAHO

Much has been said in regard to crime statistics ..... the most general being that crime statistics do not give a true picture of crime. Many crimes are never detected and therefore, not reported. A store owner may

not realize an item has been shoplifted and therefore, cannot report it. Many crimes are never reported to the police ..... gambling, liquor and drug violations, prostitution .... especially when the victim is one of the participants.

An increase in crime does not necessarily mean an actual increase since the reporting procedures of an agency may have improved or been changed. As police become more professionalized and more efficient, more crimes may be reported to them. Campaigns in a city or neighborhood, such as anti-burglary programs, could account for more burglaries being detected and reported.

While an area may show no Index Crimes, they may very well have other types of crime problems, such as forgery, fraud, embezzlement, etc. Only the arrests for these offenses are reported. A person may have suffered thousands of dollars loss due to these crimes.

We are merely cautioning any reader of this report to consider the crime statistics, not as the absolute fact, but rather as an estimate of crime in Idaho. We do feel, however, that the crime picture shown in this report is sufficient to gauge "CRIME IN IDAHO".

CRIME FACTORS

Statistics gathered under the Idaho UCR Program are police statistics. The agencies report the offense and arrest data according to the Uniform Crime Classification, not according to State statute or city ordinance.

The disposition data is police agency disposition data, rather than court disposition or county attorney disposition. Reported Part I Offenses and arrests are related to municipality and county in which they occur, rather than to the agency which may investigate, arrest or otherwise dispose of the case. The clearance, in every case, is attributed to the municipality in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense.

The factors, which influence crime rates, are dependent upon many characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and the factors that lead to or cause criminal behavior.

Awareness of the presence of certain crime factors which may influence the resulting volume and type of statistics presented is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present .. to some degree .. in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

The police are limited to the suppression and detection of crime. The fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime.

They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the government, and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.

Set forth below are some of the conditions which will, by type and volume, affect crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it may be a part.
Composition of the population with reference particularly to age, sex and race.
Economic status of the population.
Relative stability of population, including commuters, seasonal, and other transient types.
Climate, including seasonal weather conditions.
Educational and recreational characteristics.
Standards governing appointments to the police force.
Policies of the prosecuting offcials and the courts.
Attitude of the public toward law enforcement problems.
The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

MURDER

MURDER AND NON-NEGLIGENT MANSLAUGHTER

DEFINITION

Murder is defined, in the Uniform Crime Reporting Program, as the willful killing of another. The classification of this offense, as in all of the other Crime Index offenses, is based solely on police investigation, as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

IDAHO ARREST DATA

The Uniform Crime Reporting Program requests the reporting agencies to report the number of arrests made for offenses which occurred in their jurisdiction, on a monthly basis. The arresting agency does not report the arrest if it was made for another jurisdiction.

A person is scored only once for each time arrested. This means if a person is arrested and is wanted for several crimes, he would be scored only once, for the most serious crime. Several persons may be arrested in connection with one crime and each person is counted as an arrest.

Arrest data is NOT an accurate measure of the number of different persons arrested because one person may be arrested several times during the year.

VOLUME and RATE

Law Enforcement agencies, in Idaho, reported 37,261 arrests for all criminal activity, excluding traffic, in 1979. There were 4117.2 arrests per 100,000 persons in the State.

Arrests for Part I crimes accounted for 23.1 percent of the total arrests. Of these Part I arrests, 16.8 percent were for violent crimes and 83.2 percent were for non-violent crimes.

ARRESTS BY AGE

The arrest of persons under 18 years of age accounted for 35 percent of the total arrests made in 1979. Juveniles accounted for 48 percent of the total Part I offenses, as compared to 52 percent involvement of persons over 18. Juveniles accounted for 20 percent of the total arrests for violent offenses and 53 percent for non-violent Index Offenses. 62 percent of all arrests for motor vehicle theft, 58 percent of arrests for burglary, and 50 percent of arrests for larceny were Juveniles.

The arrest of persons under 15 accounted for 30 percent of the total Juvenile arrests and the arrest of persons 15 to 17 accounted for 70 percent of the total Juvenile arrests.

Of arrests made for violation of Narcotic Drug Laws, 37 percent were under the age of 18.

ARRESTS BY RACE

In 1979, 95.7 percent of all persons arrested were white: 0.5 percent were Negro: 3.5 percent were Indian and all of the "other" races accounted for 0.3 percent involvement.

LAW ENFORCEMENT OFFICERS ASSAULTED

ASSAULTS ON LAW ENFORCEMENT OFFICERS

The killing or assault of a law enforcement officer is an increasingly serious problem, faced by the law enforcement administrators nationwide, and should be of the gravest concern to the public at large. Such acts directly affect the functioning of proper law enforcement operation and thus reduce the ability of our law enforcement agencies to combat crime and maintain law and order. Today, the ambitious young man who considers a career in law enforcement must also consider the risk of being killed or assaulted by a member of the society that he is sworn to protect.

In 1979, there were 249 assaults on law enforcement officers in Idaho, as compared to 212 in 1978, which is a 17.5 percent increase. While every assault did not result in personal injury to the officer involved, many of them did result in physical harm to the officer, with loss of work time.

During 1979, 25.7 percent of all assaults resulted in injury to the officer, as compared to 25.5 percent in 1978. These 249 assaults amounted to 16.1 percent of all sworn county and city law enforcement officers.
